Privacy Core® e-learning is a comprehensive library of privacy training to help educate staff across your enterprise.

Created by leading data protection professionals and incorporating recognised interactive learning best practices, Privacy Core® units are available in multiple languages, making the latest privacy and data protection concepts accessible to all your employees. So everyone handling your organisation’s personal data can recognise the warning signs of risk.

Among its many features, the Privacy Core® library offers robust assessment functionality to effectively track your team’s learning performance, seamless integration with existing internal resources, customisation to your organisation’s brand specifications, and ongoing compliance and audit capability through your learning management system (LMS).

Need an LMS? We can help.

For maximum administrative and reporting capability, you’ll want to implement the Privacy Core library through your LMS. If you don’t have one, not to worry. When you purchase the Privacy Core e-learning library you are also eligible to purchase Logical Operations’ CHOICE LMS at a discount.

Contact sales@iapp.org to learn more about this practical, cost-effective solution.
# World’s #1 Most Widely Used Privacy Management Software

**FOR PRIVACY, SECURITY & THIRD-PARTY COMPLIANCE**

OneTrust DataGuidance™
REGULATORY RESEARCH SOFTWARE

A platform used by privacy professionals to monitor regulatory developments, mitigate risk and achieve global compliance.

Review and compare regulations across multiple jurisdictions at a glance.

Cross-Border Charts help you to easily research and compare data protection requirements globally. Each country and topic is supported by specific Guidance Notes, to provide you with an in-depth analysis of the applicable requirements.

Cross-Border Charts are available on key areas such as:

- General Data Protection Regulation
- Data Breach Notification
- Data Transfers
- Subject Access Requests
- California Consumer Privacy Act
- Employee Monitoring
- Employment Records Retention
- USA State Law Trends
- Cybersecurity

INFO by Design
www.infobydesig.co.nz
OUR SOFTWARE INCORPORATES PRINCIPLES OF PRIVACY BY DESIGN.

We treat privacy as a first-order concern at every stage of the engineering process, and build our platforms to facilitate accountability and oversight as core capabilities.

Our goal is always to eliminate the perceived need for trade-offs between privacy and utility.

© 2019 Palantir Technologies Inc.
We live in a fast paced world where personal information is a key organisational asset.

Government and private sector organisations are increasingly interested in capturing and creating value from customer interactions. However, without proper strategy and governance, personal information can quickly turn into a liability.

Targeted advertising, government surveillance and data breaches feature regularly in the headlines. The results are reduced public trust and increased resistance to innovative products and services that make use of personal information.

Managing the privacy and security of individuals is complex and Information Integrity Solutions Pty Ltd (IIS) can help you get it right.

IIS is a global data protection and privacy consultancy and is the largest privacy consulting company operating within the Asia Pacific region.

Established in 2004 by former Privacy Commissioner of Australia, Malcolm Crompton, the team at IIS has over 60 years of combined experience in privacy.

Managing the privacy and security of individuals is complex and we can help you get it right.
