Deloitte is a recognised leader in the privacy and security domain. We take a collaborative approach with our wider firm to help our clients navigate new challenges and ideas.

We believe that for a robust and sustainable approach to privacy compliance the holistic view of a client’s needs must be taken into account. We help our client’s focus on this macro picture while delivering excellence at a detailed level. We have built our Privacy Catalogue of services to support our clients in transforming their privacy programmes from disconnected activities to one that facilitates cyber transformation across their organisation.

Our service offerings form the backbone of a successful privacy transformation. Our privacy experts identify compliance and operational gaps for our clients and tailor advisory services to meet these specific needs in a way that compliments the wider business transformation.

About Deloitte
Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee (“DTTL”), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as “Deloitte Global”) does not provide services to clients. Please see www.deloitte.com/about to learn more about our global network of member firms.

- Cybersecurity preparedness and incident response
- Internet of Things
- Cross-border data transfer
- Artificial intelligence
- Emerging technologies
- Big Data
- Health care
- Privacy and security regulatory enforcement
AWS: Protecting data is our ongoing commitment to EU customers

Earning customer trust is the foundation of our business at AWS and we know you trust us to protect your most critical and sensitive assets: your data.

With AWS, you control your data by using powerful AWS services and tools that allow you to determine where your data is, how it is secured, and who has access to it.

Learn more about EU data protection »

Organisations using AWS technology can comply with EU regulations

With AWS, you can improve your ability to meet core security and EU data privacy compliance requirements, such as handling data subject requests, managing personal data breach notifications, performing data protection impact assessments, and setting technical and organisational measures with respect to the processing of your data. We help you meet European laws and standards and achieve the highest levels of security, privacy, and resilience.

We invest in the economic, technological, environmental, and social fabric of the EU

Our products and services positively transform the everyday lives of people in the EU by enabling the democratisation of technology, empowering scientific discovery, helping communities recover from COVID-19, and more.

Find out more »

We respect EU values and support industry initiatives such as GAIA-X to define standards for the next generation of data infrastructure. We supported GAIA-X from the start and contributed to technical working groups during its’ formation. We also support the Cloud Infrastructure Services Providers in Europe (CISPE) Code of Conduct and and the IaaS Code of Conduct on data portability and cloud switching (SWIPO) in support of EU regulation.
Managing information risk through technology and human expertise.
