AWS: Protecting data is our ongoing commitment to EU customers

Earning customer trust is the foundation of our business at AWS and we know you trust us to protect your most critical and sensitive assets: your data.

With AWS, you control your data by using powerful AWS services and tools that allow you to determine where your data is, how it is secured, and who has access to it.

Learn more about EU data protection »

Organisations using AWS technology can comply with EU regulations

With AWS, you can improve your ability to meet core security and EU data privacy compliance requirements, such as handling data subject requests, managing personal data breach notifications, performing data protection impact assessments, and setting technical and organisational measures with respect to the processing of your data. We help you meet European laws and standards and achieve the highest levels of security, privacy, and resilience.

We invest in the economic, technological, environmental, and social fabric of the EU

Our products and services positively transform the everyday lives of people in the EU by enabling the democratisation of technology, empowering scientific discovery, helping communities recover from COVID-19, and more.

We respect EU values and support industry initiatives such as GAIA-X to define standards for the next generation of data infrastructure. We supported GAIA-X from the start and contributed to technical working groups during its’ formation. We also support the Cloud Infrastructure Services Providers in Europe (CISPE) Code of Conduct and and the IaaS Code of Conduct on data portability and cloud switching (SWIPO) in support of EU regulation.
To have a closer look at changes we have made to improve our privacy approach and protect people’s information, visit our Privacy Matters page.

SOLVING RECORDS RETENTION ONCE AND FOR ALL

"filerskeepers is cool because it commoditizes data retention schedules in a simplified structure through a subscription model, with real-time updates that can be embedded directly into client systems."

- GARTNER

ABOUT FILERSKEEPERS

filerskeepers provides multinationals and businesses a compact insight into how long they should be storing their data based on legal requirements. We prepare data retention schedules based on our global legal research, which we integrate into our seamless data retention dashboard, enriched with all the information businesses need to determine their minimum and maximum legal retention periods in the countries relevant to them. This is how we help companies to justify why they are storing data ("for compliance with income tax rules") and for how long ("for 10 years from the date following the end of the book year").

DPOrganizer overview

Features

**Data Mapping**
- Map processing activities simply with step-by-step flows
- Easily identify gaps and monitor high-risk activities

**Reporting**
- Generate reports in a few clicks
- Privacy Program dashboard shows your activity progress at a glance

**Data Subject Requests**
- Automate intake with our customer-facing portal
- Visualise from which source the data is from, to how it’s used and who it’s shared with – with two simple clicks

**Trusted by +2100 users in 22 countries**

“what would have taken me days in spreadsheets, now only takes me a matter of minutes”

“both for me and my stakeholders, getting something done in DPOrganizer takes only 50 percent of the time it did in our previous solutions.”
