AGENCE LINÉAL - 03 20 41 40 76

The CNIL supports the development of new technologies on a daily basis and takes part in the construction of a digital ethic.
Informing, Educating

Any individual can contest the CNIL's actions by addressing a complaint or objection to the CNIL, or by bringing their case to court. In 2018, the CNIL received 11,088 complaints, representing 32.5% more than in 2017. These complaints concern, in particular, the processing of personal data (objections to receiving marketing emails); the removal of internet content); commerce related to: online reputation (requests for liability); protection of account; detection of fraud; protection of image; protection of personal data from the public... The CNIL handles 60% of complaints coming from individuals, who are the main users of its services. As a regulator, the CNIL is also a source of legal information, providing written written or oral responses to 70% of requests. These requests are processed within the file in which the question is made.

Need help is available at all times.

Video: how to use the forms, how to prepare a complaint, what to do next.

Online training on the GDPR open to all.

ADVISING AND REGULATING

The CNIL advising and regulating activity is driven by: awareness campaigns, legal and practical advice for professionals, initial training sessions, or awareness drives, and the support of or participation in consultation exercises. All these activities contribute to the CNIL's mission and bring together a collective activity in order to inform and guide individuals and organizations.

The CNIL responds to requests made by the CNIL ensures that citizens can effectively access their data contained in any processing operation. In 2018, the CNIL designed thematic sheets to support startups in their comparison activity. In 2018, the CNIL designed thematic sheets to support startups in their comparison activity. In 2018, the CNIL designed thematic sheets to support startups in their comparison activity. In 2018, the CNIL designed thematic sheets to support startups in their comparison activity.

CNIL's activity is in line with the «Digital Action Plan» which aims to facilitate innovation, notably in terms of data.

...
The General Data Protection Regulation (GDPR) entered into force on 25 May 2018. It provides for Europe’s adaptation to the new realities of digital technology. It concerns all companies that manage and secure their data, in line with the rights and freedoms of citizens. The CNIL oversees the implementation of the GDPR and ensures that citizens can effectively access their data contained in any processing activity. The CNIL’s advising and regulating activity is essential to ensure compliance with the law. For companies, the GDPR offers a complete tool kit, adapted to all organisation sizes and advantages. To help private and public organisations to comply with the GDPR for Microenterprises and SMEs, the CNIL offers a new online training course open to all (MOOC). This course offers the opportunity to discover or better understand the GDPR for their entire business activity, the CNIL oversees research into new files, advice, and participation in government’s draft legislation concerning privacy-by-design approach.

The CNIL is openly and transparently interested in breaches of legal provisions, the CNIL can: Issue an administrative fine; Order them to comply with data subjects’ processing operation; Temporarily or definitively restrict a processing activity; Erase or destroy the personal data by hand or by any other means; or prohibit the transfer of data to a third party; and Issue an administrative decision. In order to contribute to discussions on digital innovation, the CNIL has set up a Foresight Committee. This Committee supports the regulation of companies as early as possible, according to a transparency-based approach. It provides for Europe’s adaptation to the new realities of digital technology and ensures that citizens can effectively access their data contained in any processing activity. The CNIL’s advising and regulating activity is essential to ensure compliance with the law. For companies, the GDPR offers a complete tool kit, adapted to all organisation sizes and advantages. To help private and public organisations to comply with the GDPR for Microenterprises and SMEs, the CNIL offers a new online training course open to all (MOOC). This course offers the opportunity to discover or better understand the GDPR for their entire business activity, the CNIL oversees research into new files, advice, and participation in government’s draft legislation concerning privacy-by-design approach.

In order to contribute to discussions on digital innovation, the CNIL has set up a Foresight Committee. This Committee supports the regulation of companies as early as possible, according to a transparency-based approach. It provides for Europe’s adaptation to the new realities of digital technology. For ten years, the CNIL has engaged itself in a data protection promotional campaign. It is necessary to take action: a guide for data processors; A 6-step method to implementing the main provisions of the GDPR; A guide for data processors; A guide for data controllers; An overview of the key provisions of the GDPR; and The CNIL at the service of companies.

Online training on the GDPR open to all:

To help organisations to prepare for the GDPR for their entire business activity, the CNIL has developed a training course open to all (MOOC). This course offers the opportunity to discover or better understand the GDPR for their entire business activity, the CNIL oversees research into new files, advice, and participation in government’s draft legislation concerning privacy-by-design approach.

The End of Declarations
The General Data Protection Regulation (GDPR) entered into force on 25 May 2018. It provides for Europe’s adaptation to the new realities of digital technology. It concerns all companies that manage and secure their data, in line with the rights and freedoms of citizens. The CNIL oversees the implementation of the GDPR and ensures that citizens can effectively access their data contained in any processing activity. The CNIL’s advising and regulating activity is essential to ensure compliance with the law. For companies, the GDPR offers a complete tool kit, adapted to all organisation sizes and advantages. To help private and public organisations to comply with the GDPR for Microenterprises and SMEs, the CNIL offers a new online training course open to all (MOOC). This course offers the opportunity to discover or better understand the GDPR for their entire business activity, the CNIL oversees research into new files, advice, and participation in government’s draft legislation concerning privacy-by-design approach.
INFORMING, EDUCATING

Any individual can contact the CNIL upon request for information regarding their data protection rights. The CNIL responds to requests for information made by individuals, notably by providing on its website: detailed information on the CNIL’s fusion-paragraph, the CNIL’s procedure for processing personal data, articles in the press, reports from investigations and complaints, audiovisual and information campaigns. The CNIL’s mission is to inform and education the public on the protection of personal data, with particular emphasis on the European legislation. The CNIL has the goal of promoting a culture of privacy and personal data protection.

The CNIL has been conducting an awareness-raising campaign to inform the public about its rights and responsibilities in relation to personal data protection. This campaign includes seminars, conferences, and training sessions for a wide range of audiences, including professionals, students, and the general public. The CNIL aims to raise awareness about the importance of protecting personal data and to encourage individuals to take action to protect their privacy.

PROTECTING CITIZENS’ RIGHTS

The CNIL is attentive to complaints and investigations related to the processing of personal data. It is a regulatory body that enforces data protection law, with the authority to investigate complaints and assess whether or not they are justified. The CNIL also has the power to impose sanctions and fines on organizations that violate data protection law.

The CNIL’s investigations are based on complaints from individuals or other organizations, or on its own initiative. The CNIL’s investigations are conducted in a fair and impartial manner, and the results are made public. The CNIL is committed to protecting the privacy and personal data of individuals and to ensuring that organizations comply with data protection law.

ACCOMPANYING AND REGULATING

The CNIL advises and supports public and private bodies implementing data protection law, by preparing them for the entry into force of the GDPR. The CNIL’s advice is based on a thorough analysis of the bodies’ data processing activities, and it is provided in the form of detailed recommendations.

ADVISING AND REGULATING

The CNIL’s mission is to ensure the enforcement of data protection law, including the GDPR. It provides advice and guidance to organizations on how to comply with the law, and it investigates complaints and takes action against organizations that violate the law. The CNIL is also responsible for drafting and implementing regulations that interpret the GDPR.

ACCOMPANYING COMPLIANCE

The CNIL’s mission is to accompany organizations in their efforts to comply with the GDPR. It provides them with guidance and support, including through training sessions and publications. The CNIL also monitors the implementation of the GDPR and assesses its effectiveness.

Online training on the GDPR open to all

The CNIL is offering online training on the GDPR, which is accessible to all organizations and individuals involved in processing personal data, free of charge. The training is designed to help organizations understand their obligations under the GDPR and to comply with its requirements.

The medium dedicated to digital innovation

In order to contribute to discussion on innovation in the field of personal data protection, the CNIL has created a new medium, the LINC, which is a French acronym for "Laboratoire d'Innovation Numérique pour les Comptes Individuels". The LINC is a research laboratory that aims to develop innovative solutions for the protection of personal data.

LINC

The medium dedicated to digital innovation

ONLINE TRAINING

The CNIL is offering online training on the GDPR, which is accessible to all organizations and individuals involved in processing personal data, free of charge. The training is designed to help organizations understand their obligations under the GDPR and to comply with its requirements.

Anticipating

For some investigations are considered to be a financial impact of exceptional interest data controllers. When they allow the CNIL to measure the economic impact of their activities, they encourage more participative and proactive approaches, mainly to support their stakeholders.

Inspecting and sanctioning

The CNIL also investigates and sanctions violations of data protection law, including the GDPR. It can impose fines on organizations that violate the law, and it can take other measures to ensure compliance.

Inspecting and sanctioning

The CNIL is responsible for monitoring and enforcing data protection law across Europe. It investigates complaints and takes action against organizations that violate the law, and it can impose fines and other sanctions.

The GDPR eliminates requirements that the data protection legislation must be transposed: the principle of adequacy in the European Union and the principle of equivalence in international data transfers.

Online training on the GDPR open to all

The CNIL is offering online training on the GDPR, which is accessible to all organizations and individuals involved in processing personal data, free of charge. The training is designed to help organizations understand their obligations under the GDPR and to comply with its requirements.

THE EUROPEAN REGULATION

The General Data Protection Regulation (GDPR) entered into force on 25 May 2018. It provides for Europe’s adaptation to the new realities of digital technology. It codifies the principles and rules that regulate the processing of personal data.

The GDPR applies to any organization that processes personal data in the European Union. It establishes a comprehensive framework for the protection of personal data, including the rights of data subjects, the responsibilities of data controllers and data processors, and the enforcement mechanisms.

FUNCTIONING

PLenary SESSIONS
The members of the CNIL hold a plenary session once a week according to an agenda set by the Chair. A substantial part of these sessions is dedicated to the review of draft legislation and decrees submitted by the government for an official CNIL opinion. It analyses the consequences of new technologies on citizens’ private lives.

RESTRICTIVE COMMITTEE
The CNIL’s restricted committee includes 5 members and a Chairman separate from the Chair of the CNIL. It can impose various sanctions on data controllers who do not comply with law. Under the GDPR (General Data Protection Regulation), the amount of financial sanctions can reach up to €20 million, or for companies up to 4% of their global yearly turnover. These financial sanctions can be made public.
