

CANADIAN PRIVACY

This training is an opportunity to learn about critical privacy concepts that are also integral to the CIPP/C exam. While not purely a “test prep” course, this training is appropriate for professionals who plan to certify, as well for those who want to deepen their privacy knowledge. Both the training and the exam are based on the same body of knowledge.

ONLINE TRAINING

MODULES:

Module 1: Introduction to Canadian privacy

Summarizes the basics of information privacy and discusses the history of privacy, and world models for data protection

Module 2: Legal basics

Outlines the Canadian government and legal structure, plus reviews the political structure of the Canadian government, division of powers, courts and administrative tribunals, sources of law, and enforcement agencies and powers

Module 3: Privacy basics

Provides definitions of personal information, employee and work-product information, publicly available information, and private or sensitive information, plus introduces the basic privacy principles underlying the Model Code for the Protection of Personal Information

Module 4: Private-sector privacy laws and practices

Reviews Canadian private-sector statutes, with a focus on PIPEDA; outlines the 10 fair information principles that make up the Model Code for the Protection of Personal Information

Module 5: Private-sector statutes

Focuses on the Personal Information Protection Acts of Alberta and British Columbia (“the PIPAs”), the Quebec Act, and Canada’s Anti-Spam Legislation (CASL) while examining case studies that illustrate laws in practice

Module 6: Public-sector laws and practices

Reviews public-sector privacy laws with a focus on the Privacy Act, including key policies and guidelines and a discussion of the privacy commissioner’s role

Module 7: Public-sector privacy statutes

Compares the Privacy Act to similar provincial laws and explores privacy impact assessments, data sharing, and web analytics; transborder data flows and contractual agreements are also discussed

Module 8: Health information privacy

Reviews private- and public-sector health information privacy laws, including provincial health privacy laws, and those governing key health information organizations and genetic testing
